# myON iPad App Release Notes

Version 1.0

App Features

Your myON subscription includes a free myON app! This app is available in iTunes – search for the keyword "myON", and select the iPad app. The app:

- Lets you share iPads between students and classes.
- Lets you download up to twenty books to read anytime (even if you don't have an Internet connection after downloading).
- Keeps track of student reading statistics online and offline, and synchs activity to student myON accounts.
- Makes every book in your myON collection available through the iPad for offline reading.
- Lets you select books to download through visual search or through the myON.com website on Safari or Chrome.
- Includes book reading scaffolds for audio and highlighting.

System Requirements

Your iPad must be using iOS 5.1 or higher to use the myON iPad app. To add accounts and/or books to the app, you must be able to connect to the Internet. iPads can use the built-in Safari web browser (or the Google Chrome web browser app) to access www.myon.com, and iPads can use the free myON app (available through iTunes) to read even when there is no Internet connection.
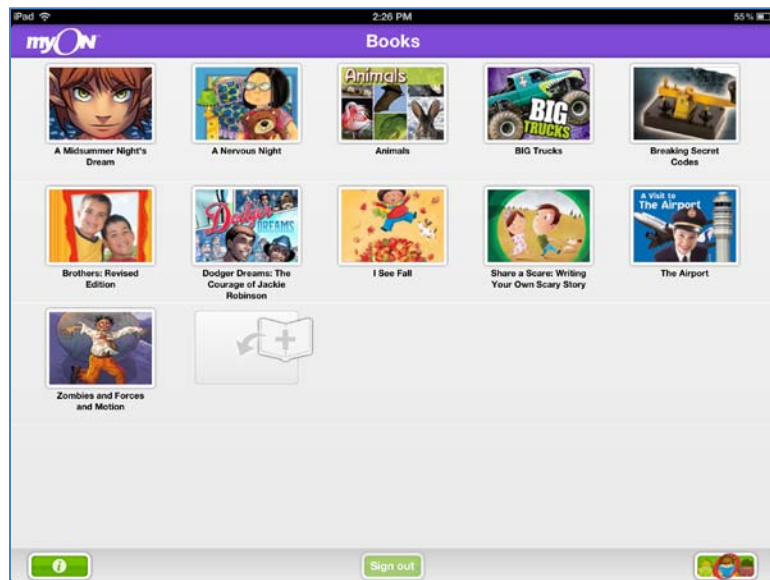

Not sure what iOS version your iPad is running? Updates are free through iTunes or directly from your iPad. Just select the Settings button, and then choose General.

Under the About menu, you'll see "Version". If this is anything less than 5.1, please go back to General and select Software Update. Follow the on-screen prompts to update your iPad to the most recent Operating System version. If you have problems updating your iPad to the most recent version of iOS, please contact Apple: http://support.apple.com/kb/HT4623.

Step-by-Step

After downloading the app, you can immediately read the included Jackie Robinson book. To read other books, you must first load user accounts to the app.

Loading User Accounts

Tap the bottom right corner of the screen to see what users are available. Press the "+" to add new user accounts.
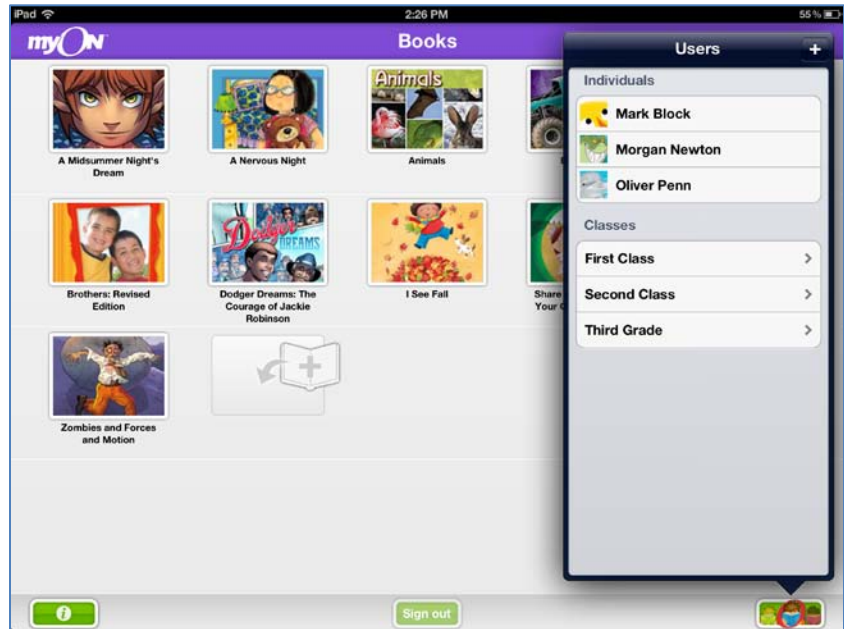

Student Account

If you are adding a student account, just enter the school name, username, and password (just like logging into myON). The app will record the student as a registered user of the iPad for the myON app. In the future, the student will login by selecting their name and entering the login username.

Teacher Account

Adding a teacher account allows the teacher to add their complete class list to the iPad app. Login just as you would on the myON website, and select which classes or groups should be added as users to this iPad. One tap, and you're done.
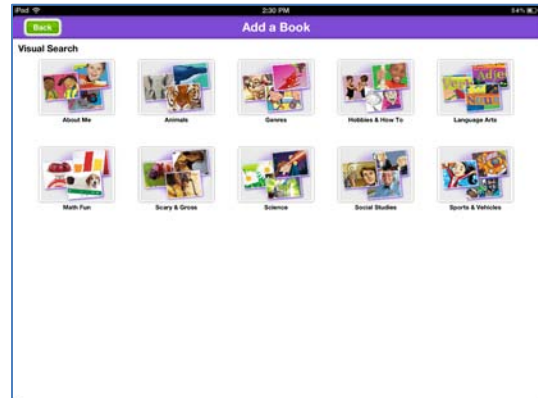

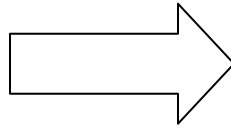

Signing In

Once there are accounts on the iPad app, you can sign in to begin downloading and reading other books through the app. Tap the button on the bottom right corner to find your name. Now tap your name and enter your login username. You are signed in!

Adding a Book

Click the Add Book button to browse the myON collection of titles to find one you'd like to read. Adding a book through the app opens a visual search, where you can select what category you are interested in.

Choosing one of the top levels of categories (like "Animals") will open a secondary list where you can further refine your search. After your search has been limited by the category, you can select individual titles. Click on a title you are interested in to see download details.

Just choose the "Add to iPad" button if this is the book you want to read through the app. If you've changed your mind, click the red "x" to close this book and select a different one.

You can also use the myON website through Safari (www.myon.com) to find books to download – you'll see a "download" option which will open your app and add the book.

For more information call: (888) 728.1266 · myON.com

Reading a Book

Once you've selected a book to read, it will open within the app.

- The "Play/Pause" button at the bottom stops the audio and highlighting. When it's paused, tapping the button will start the audio narration and highlighting again.
- Swipe your finger to turn the page – back and forth.
- Expand two fingers to zoom in on page.
- Pinch two fingers to zoom out from a page.
- Activate the Reader Controls by tapping anywhere on the screen.

The icons (from left to right) let you:

- Return to the Books page
- See additional book content
- View publisher information about the book
- Jump to any page you've already read
- Mute the audio for silent reading without highlighting
- Pause (or Play) the Audio and Highlighting
- Turn Off (or On) Word Highlighting
- Turn Off (or On) Sentence Highlighting

Need More Information?

While in the app, click the green information button in the bottom left hand corner to get answers to any questions you may have. Additional features (like deleting books and users from the app) are explored in the information screen.
